Griffin Patterson prepared for early success in racing industry
Welcome

We can see further because we stand on the shoulders of giants.

This sentiment, credited to Sir Isaac Newton, suggests that our impact in the future is made possible only by the efforts of those in the past. It is especially pertinent to my letter because 2015 is a big year in the life of the UK Ag Equine Programs! In case you don’t know, 2015 marks 10 years since the UK Ag Equine Programs (then called the Equine Initiative) was started. We have spent a lot of time looking back at the past 10 years taking inventory of the program’s many accomplishments, all the while looking forward to what may be possible in the next 10 years…how can we make the biggest impact on the global equine industry? What will it take to accomplish that?

But…did you ever stop to think about the critical role that YOU are playing in the future of the Equine Programs?

In college, I played Division I volleyball. We had less-than-desirable facilities, but we practiced hard, and we had a reasonably successful team. A few months after my eligibility was up, the university broke ground on a shiny new arena which the volleyball team would thereafter call home. Initially, I was annoyed that I never got to enjoy that great facility. But then, I realized that I, along with my current teammates and those who had come before me, had provided the foundation and framework that was needed for that next big step. And by having that new facility, the university was in a better position to recruit better athletes and continue raising the quality of the program. Looking back, I realize that it’s not that any of us were “giants,” but the sum of the individual parts paved the way to the next level.

The same is true for you. The Equine Programs has accomplished a lot in the past 10 years, and its opportunities for lasting impact in the future are unlimited. But, the future impact the Equine Programs will ultimately make depends on YOU. It depends on conversations you have with your classmates. It depends on questions you ask your instructors. It depends on internships, jobs and extracurricular activities. The list goes on. YOU are an essential part of the framework that is being established to help launch the UK Ag Equine Programs as a global leader in the equine industry in the next 10 years and beyond.

Jill Stowe
UK Ag Equine Programs Director
Upcoming events/deadlines:

- September 1
  Last day to add a class

- September 7
  Labor day (no classes)

- September 16
  CAFE Career Fair

- September 16
  Last day to drop a class without appearing on transcript

- September 17
  Welcome Back BBQ

- September 26
  Last day to change majors

- September 26-December 4
  Graduation checks for May 2016 graduates

- September 28-November 25

Industry Spotlight

Alexandra Harper

Bob Coleman, or Dr. Bob as most know him around the College, grew up in Brandon, Manitoba, Canada. Coleman is the extension horse specialist and director of undergraduate studies in equine science and management within UK's College of Agriculture, Food and Environment.

Coleman completed his Bachelor of Science in animal science and master's in animal nutrition at the University of Manitoba. He then completed his doctorate at the University of Alberta in animal nutrition.

While neither university had an equine program, Coleman was certainly a horse enthusiast. He enjoyed showing Hackney Ponies as a youth. He also has experience riding hunters, working with Standardbreds and was a ring steward for the major draft horse shows in western Canada for five or six years. Coleman currently rides when time allows and his favorite breed is the Quarter Horse.

Coleman came to the University of Kentucky in 1998 as the extension specialist with a responsibility for extension and some teaching.

“The opportunities in Kentucky were great, and I remember a comment from Laurie Lawrence, 'Look at all you can do here.' It is like no other place in the country,” Coleman said.

Coleman's primary focus now is equine extension. The programs he works on are primarily for adult horse owners across all of Kentucky's 120 counties, and include all breeds and disciplines. He also teaches courses each semester in the Equine Science and Management curriculum; Capstone both semesters, Tack and Tools with Kristen Wilson in the fall and Facility Design and Management with Jill Stowe in the spring.

When asked what his favorite part about his job was, Coleman said, “I really enjoy all parts of my job because it is centered on the horse. It's like the Ag Equine Programs' motto, ‘The horse is at the heart of everything we do.' Learning new things that relate to the horse and the industry fascinates me,” Coleman said.

When Coleman isn't teaching or traveling for his extension work, you can find him reading, working in the yard or riding. He also has a fascination for learning about horse tack and equipment and has become especially interested in bits and how they work.
Welcome back Equine Science and Management students!

Kristen Wilson

The new academic year is now upon us and you can definitely tell from the recent increase in activity across campus. We are excited to welcome in approximately 115 new students to the Equine Science and Management Program this fall. As a matter of fact, we are now the second largest major within the College.

As you are settling into the new semester, please remember that your academic advisor can be a great resource for answering questions you might have. Contact information for each of our equine academic advisors is below. If you do not know who your advisor is, please check via myUK or contact Kristen Wilson. Finally, be sure to check the calendar of events for important deadlines in regards to course drop/adds and schedule changes.

Cosequin Presents OTTB Showcase: Keeping Things Grounded

Jen Roytz and The Paulick Report

It’s not too often that you find an off-track Thoroughbred that was unraced but didn’t retire until he was five, but that’s exactly what happened to the horse Joe Desoto. Sven, as he’s known these days, was purchased for $500 by a pair of University of Kentucky students who have aspirations of competing with him in the Retired Racehorse Project’s Thoroughbred Makeover this October.

Sponsored by the Thoroughbred Charities of America (TCA), the Thoroughbred Makeover is a three-day competition at the Kentucky Horse Park October 23 through October 25 that allows professional, amateur and junior riders to show their skills in retraining off-track Thoroughbreds in one or two of ten designated divisions. Attendees also enjoy seminars, training demonstrations, a vendor fair and more, all focused on caring for and training retired racehorses for second careers.

To read the entire story, visit http://www.paulickreport.com/features/ottb-showcase/cosequin-presents-ottb-showcase-keeping-things-grounded/.
Student Professionalism Series

Elizabeth A. LaBonty

The University of Kentucky Equine Science and Management Undergraduate Degree Program strives to not only educate you about equine science, but also to prepare you for your future career. Part of this preparation includes classroom guest lectures, hands on labs, requiring an internship before you graduate, exposing you to numerous industry related careers and, most recently, we have added a series called the Student Professionalism Series to the Wildcat Canter. The Student Professionalism Series will offer insights and tips to help you effectively prepare for, find, apply to and obtain the career of your choice. This month we will be exploring transitions.

Spring is a time of rebirth, summer of celebration and winter hibernation. But what about fall? Fall is a time of transition. Transitioning from warm to cold, from iced tea to hot cocoa and from long days to long nights. Students are also transitioning in the fall. Freshman are adjusting to life at college, sophomores to settling in, juniors are becoming upperclassman, and seniors are preparing for their last year. Transitions are hard. But they are also an opportunity for incredible growth. Successfully maneuvering a transition requires knowing where you’re going and remembering where you’ve been.

What are your goals this fall? What do you want to get out of your classes? I would challenge you to do more than just survive the upcoming semester; I would encourage you to thrive. Make friends, get to know your professors, join a club, aim for a 4.0 or try a new job. Think about where you want to be and how you want to feel in December when you head home for Christmas break. Then write down those goals and put them somewhere you see them – every day. Knowing where you are going will help you on the tough days. The days when it’s cold outside, when it’s hard to get out of bed and when it seems you can do anything except focus. Maybe you will tape a picture of a role model on your mirror so you see them every day or you will write a list of words you would like to have others describe you as. Everyone’s goals are different but we are all going somewhere, whether it’s planned or not.

Be sure to use the resources available to you to help you get where you want to go. The University of Kentucky, the College of Agriculture, Food and Environment and the Equine Science and Management program are all a wealth of support right at your fingertips. You are surrounded by faculty, staff, advisors, administrators, coaches and peers who all want to see you succeed. Get to know them, ask them questions, if you need help – ask and help each other out along the way. The most successful people I know are the ones who are always helping others achieve their very best. The last part about a good transition is to always remember where you have been. Maybe your past is something you are proud of. Maybe it’s not. Either way, it’s behind you. If you have things you want to change, things you don’t ever want to do again, then today is the day that you can decide from this day what you want to do, who you want to be and what you will and won’t do ever again.

Perhaps leaving the past behind is painful for you because it was so good. Maybe there are people you miss, risks you have taken or things you have accomplished and you’re afraid that it will never be that good again. Well you’re in luck. I am here to tell you that things just keep getting better. I loved high school and growing up in Montana. Transitioning to the University of Nebraska where I didn’t know a soul was hard, but I wouldn’t change my college experience there for anything in the world!

Graduating from undergrad was not easy. But my KEMI internship at Juddmonte Farms in Lexington changed my life. Making the decision to go back to graduate school was difficult, but I wouldn’t have the job that I have now had I not. Leaving a job teaching colt starting at Laramie County Community College was one of the most difficult decisions I have ever made, but I love my life in Lexington and couldn’t imagine my life any other way.

Transitions are hard. But if it was easy, everyone would do it. My story is only one of many. You are surrounded by faculty and staff who have all been through many transitions in of their own and they are here to help you every step of the way. My door is always open. May this fall, this semester and this transition be your best yet.
Equine Science and Management
Alumni Profile
Cyndi Simmons, ‘11
Assistant Trainer at Rose Stables LLC

Where is home for you?
Burlington, Ky. No, not like the coat factory.

How did you first become involved in the horse industry?
My father grew up with a retired combination horse named Vanity Herself. He will tell me stories from time to time about trotting down his neighborhood street, with an old bridle he put together and a western saddle. Having grown up around Saddlebreds, my father decided to give my mother riding lessons as a wedding gift. They both stuck with it until after I was born, so naturally I became involved from a very young age. I can’t remember a time that I wasn’t on the back of a horse, and incredibly my first pony, Tina, is still going strong!

What were your career goals before graduation?
Early in my college education, I had an idea but wasn’t completely sure, like most students starting off. After deciding to pursue my bachelor’s in Equine Science and Management, I knew that my childhood dream of becoming a horse trainer was truly what I wanted to do for a career. Luckily enough, the degree was beneficial to becoming a horse trainer.

What led you to this position?
Growing up in the American Saddlebred and show horse industry, I was lucky enough to have already established a network as well as mentors that I look up to. I enjoy all breeds of horses, however there is something exciting and addicting about being astride an American Saddlebred, and to me there is nothing better than to make a career of it.

Where are you currently employed?
Rose Stables LLC in Shelbyville, Ky. We specialize in training and sales of American Saddlebreds and Hackney Ponies. I also have a small riding lesson program as well.

What are your current job responsibilities?
As the assistant trainer at Rose Stables LLC, I am responsible for working a show string, managing the grooms and helping them get horses ready to work, as well as the care and feeding of all the horses on the farm. My ESMA degree comes in handy while administering medical aid to sick or injured horses, and I can utilize it as well in prepping show horses to their peak fitness for competition.

How are you currently involved in the horse industry?
As an assistant trainer, I am required to be a member of the United States Equestrian Federation, United Professional Horseman’s Association, and the American Saddlebred Horse Association. I am also a Young Committee member of the American Saddlebred Museum. Compared to most of the other equine industries we are quite small, but we also have a very colorful past, so I believe that it is crucial to preserve and share our history.

What advice do you have for current equine students?
Keep an open mind! When it comes to horses, you will always be learning.
UK Ag Equine Programs and Rood & Riddle Equine Hospital Scholarship Fund

Alexandra Harper

Due to the generosity of Rood & Riddle Equine Hospital, UK Ag Equine Programs has established a scholarship fund over the years to offset costs of equine-focused students.

Kelli Powers, a senior majoring in Equine Science and Management with a minor in biology, is the recipient of the Rood & Riddle Equine Hospital scholarship for 2015-2016.

Powers grew up in Columbus, Ohio, and has always wanted to become a veterinarian, specifically, an equine veterinarian. Powers recently applied to veterinary school and hopes to attend after graduation.

“Earning a college degree is expensive and this scholarship will help me pay for some of my undergraduate education,” Powers said. “This scholarship has enabled me to begin saving for my upcoming veterinary school expenses.”

Some of Power’s hobbies include riding and rooting for UK sports and the Boston Red Sox.

Megan Douglass was the recipient of the Rood & Riddle Equine Hospital scholarship from 2014-2015.

Douglass grew up in New Waterford, Ohio, but Lexington has now become her home. She is a junior, currently majoring in Equine Science and Management, with an emphasis in Equine Science.

“This scholarship has helped me pay for my education,” Douglass said.

After graduation Douglass plans to travel abroad and ride in Europe. She will be pursuing a career in show jumping. Douglass’ goals are to increase her knowledge in all aspects of the horse industry and to experience as much as possible.

In her spare time, Douglass enjoys reading, kayaking, hiking and photography.

The Rood & Riddle Scholarship is for equine students that are sophomore status or above. Students must fill out the general college scholarship application to be considered. The application will be available on the College of Agriculture, Food and Environment website in mid-February and is due April 1.
UKAg diversity director recognized as a Game Changer

Aimee Nielson

University of Kentucky College of Agriculture, Food and Environment assistant dean and director of the Office of Diversity, Quentin Tyler, was recently named a Game Changer by Workforce Magazine.

The human resources publication annually gives the Game Changer awards to “high-potential young professionals under age 40, who are pushing the human resources field forward with innovative people-management practices.”

For Tyler, diversity is a way of life, but not always something that is easy to create or to sustain. Workforce Magazine said Tyler’s efforts to strengthen campus diversity have led to the UK Cooperative Extension Service employing the highest number of women and minorities to date.

At just 35 years old, Tyler has helped recruit, retain and develop a diverse faculty, staff and student population and has been part of the hiring process for nearly 600 people since 2005.

“This award not only recognizes the achievements that we have made as a college and university, but also confirms that we are moving along the right path as a land-grant institution that believes in creating a welcoming and inclusive environment that allows our faculty, staff and students to reach successful outcomes,” Tyler said.

Workforce Magazine said Tyler is focused on building a diverse pipeline. During his tenure, the university’s summer intern program has offered leadership to an increasingly diverse young cohort. Tyler has created a diversity fellowship for graduate students and helped build cultural awareness workshops, a youth development high school program and conference to introduce the next diverse generation of students to college life.

The magazine will feature Tyler and other game changers in its August issue.

Griffin Patterson Prepared for Early Success in Racing Industry

Jessica Smith
Source: Lady and the Track

Griffin Patterson Prepared for Early Success in Racing Industry: Staring right in the face of the worn-out adage that horse racing will disappear with the “old” generation is Griffin Patterson, a 22-year-old with big plans in the racing industry. Even at such a young age, Griffin has already tested the waters of many aspects of the Thoroughbred world in a Renaissance-like attempt to experience and learn as much as he possibly can.

UK Ag Equine Programs wins NAJYRC jump decorating contest

The UK Ag Equine Programs was selected as the winner of this year’s NAJYRC cross country jump decorating contest (kudos to Alexandra Harper, UK Ag Equine Programs’ operations and communications coordinator, and Hannah Forte, communications intern, for their winning design!). The prize is a standard tailgate spot at the 2016 Rolex Kentucky Three-Day Event, which comes with six general admission tickets for Saturday’s cross country.

Bluegrass Equine Digest

Check out the August issue of the Bluegrass Equine Digest, a free, monthly electronic newsletter dedicated to providing up-to-date information on equine research from the University of Kentucky’s College of Agriculture, Food and Environment in collaboration with TheHorse.com and sponsored by Zoetis. UK Dressage and Eventing Team announces new coach

Hannah Forte

The University of Kentucky Dressage and Eventing Team (UKDET) welcomes Maria Elvira Montalvo as the new coach for the Intercollegiate Dressage Association (IDA) team. Montalvo and UKDET members will work together to fulfill the IDA mission of fostering the understanding, development and appreciation of dressage through participating in various competitive and educational opportunities.

“We are excited to have Maria become a part of the team,” Elizabeth Lampert, president of UKDET, said. “Her enthusiasm and dedication to the team is extraordinary, and guarantees another successful year for UKDET.”

Originally from Ecuador, Montalvo moved to the U.S. when she was 8 years old. She attended UK to obtain a degree in elementary education, and is also a past member of UKDET. Her riding career highlights include a spot on the 2011 Pan American Games team to represent Ecuador as well as experience through the preliminary level of 3-day eventing. Montalvo recently purchased Serenity Springs Farm LLC in Nicholasville, Ky., to start her own training and lessons business.

The IDA team consists of 12 riders who compete from introductory to first level at various competitions during the academic year. The IDA team allows UK to be represented at regional and national competitions with other schools. More information on joining the IDA team will be distributed at the first meeting on Sept. 2. Tryouts will take place on Sept. 19, and the first competition will take place on Oct. 25-26 at Otterbein University. For more information about UKDET, please contact Hannah Forte at hannah.forte@gmail.com.

VIDEO: welcome back from the UK Family!

Source: UK Now

Watch as professors, researchers, students, staff, alumni and even UK Football Coach Mark Stoops join President Eli Capilouto to welcome the Big Blue Family back to campus for the 2015-16 academic year!

http://uknow.uky.edu/content/video-welcome-back-uk-family
Clubs and teams

Equestrian Team

Western Team
The western team’s first meeting will be Thursday, Aug. 27 at 7 p.m. in the Alumni Gallery of William T. Young Library. The first lessons will be Monday, Sept. 1 and Tuesday, Sept. 2. For questions, you may contact the team president AnnMarie Kadnar at annmarie.kadnar@uky.edu, or the official team email ukwesternequestrian@gmail.com.

Dressage and Eventing Team
UKDET is a club sport that has members of all levels, united by the desire to improve their riding and gain more experience. This team is unique because it takes two disciplines and combines them into one team, which allows the team to provide more opportunities to its riders. You can be a member of UKDET if you ride dressage, event or wish to compete at collegiate level competitions.

The first meeting will be on Sept. 2 at 8:30 p.m., in the Complex Commons Building, room 308A and 308B. Please contact Hannah.forte@gmail.com if you have any questions.

Horse Racing Club
The first Horse Racing Club meeting will be held Wednesday, Sept. 2 in the Alumni Gallery of the William T. Young Library. The meeting, with pizza, will start at 7 p.m., speaker at 7:30 p.m. The speaker for this meeting is Carl McEntee, sales and bloodstock director for Darby Dan Farm, who will talk about the upcoming sales.

R.E.A.D
The Research in Equine and Agricultural Disciplines (R.E.A.D.) Club is a club dedicated to connecting undergraduates to cutting edge research done at the university level as well as in the industry. The club welcomes all students and offers volunteering, presentations and field trips in all areas of agricultural science. Though the club encourages students to expand into other animal science research, it hosts a majority of equine presentations and trips- we take advantage of being in the Horse Capital of the World! The first meeting will be Tuesday, Sept. 8 at 7:30 p.m. We hope to see you there!
